Re: Cabot Oil & Gas Corporation Response to EPA CERCLA Section 104(e)  
Request for Information, Dated January 6, 2012.

Dear Ms. Zia:

Cabot Oil & Gas Corporation has been providing responses to the above-referenced request for information on a rolling basis. Except to the extent additional responsive information is identified, this letter provides the remainder of Cabot's supplemental response to the RFI, including documents bates labeled CABOT-EPA 127079-129633.<sup>1</sup>

This production includes additional sampling data, such as field sheets, chain of custody sheets, lab reports, landowner analytical summaries all organized by landowner tax map, and a spreadsheet providing EDD (including that for those from third parties) associated with the Area of Concern, in response to Request numbers 1 and 2.

The EDD spreadsheet contains a "Column K", entitled "*analysis\_status*" that states that the data is either "Draft" or "Finalized". This field refers to the status of construction of the EDD. Because the EDD in the chart was not all recorded simultaneously with the generation of the data, notes were kept as to the status of data that was being transcribed. As transcription was completed and the data was verified, the data was noted to be "finalized." For data that is still noted to be "draft", we have simply transcribed the data; we were not able to verify the accuracy or completeness of the data provided to us.

<sup>1</sup> We would also like to clarify a few items from prior productions. First, the production dated February 24, 2012 included documents through bates number CABOT-EPA 127078, which is different from the end bates number noted on the cover letter. Second, the production dated February 24, 2012 starts with bates number CABOT-EPA 114640 because the February 10, 2012 production ended with CABOT-EPA 114639. Please note that this is different from the number noted in our cover letter for the February 10, 2012 production, which erroneously indicated that the bates range ended with CABOT-EPA 111619.

With regard to RFI Question 3, we have provided information regarding the individuals to whom Cabot provided water and the reason for the provision of water to the extent it was available, Bates-labeled CABOT-EPA 129478-129487. Note that the information redacted from these documents relates to activities outside the Area of Concern and is therefore nonresponsive. Cabot also has provided water to **Ex. 6 - Personal Privacy** however, at the time of this production Cabot was unable to identify documentation relevant to these individuals. For the sake of expediency and ease of EPA's review, we have not provided additional information, such as administrative information (individual invoices billing Cabot for individual, often daily water supplies, emails coordinating those deliveries, correspondence with the Pennsylvania Department of Environmental Protection regarding the Consent Order and Settlement Agreement (COSA), and the like). Please let us know if EPA was seeking information of that granularity. Finally, the individuals identified in the enclosed document Bates-labeled CABOT-EPA 129478-129479 have received water according to the COSA, which is information in the public record, and therefore, we have not provided additional information related to these individuals.

As requested, we have enclosed with this submission a certification by a responsible Cabot official that covers all of the submissions that have been made in February 2012.

Thank you very much and do not hesitate to contact me with any questions or comments.

Very truly yours,

Bracewell & Giuliani LLP

Jason B. Hutt

Enclosure

cc: Kevin Cunningham, *Cabot Oil & Gas Corporation*

## CERTIFICATION

**"I certify under penalty of law that I am familiar with categories of information submitted in response to the EPA's Request for Information concerning the Dimock Township Drinking Water Contamination Area, and that based on my inquiry of those responsible for obtaining the information, I believe that the submitted information is true, accurate and as complete as possible given the limited time frame."**
